Phone 07722 443125

I specialise in web development, with a focus on cross-platform compatibility and attention to detail. I approach each project with enthusiasm and a willingness to learn. I am an excellent problem solver and am always looking to improve my skill set.

Web Developer, Opia Ltd. 2016–2017, 2018-Current.
I deliver and maintain customer-facing applications for Opia, a market-leading, risk-managed sales promotion agency. We create applications for some of the world's leading brands: Google, Microsoft, HP, Dell, Huawei, Samsung, Lenovo and more. I build PHP web apps using a test-driven, MVC approach. Within the company, I champion top-notch front-end design: using SASS, CSS3, Blade and VueJS to design responsive, dynamic websites and emails for our clients.

Frontend Developer, Drew London. 2017–2018.
As lead front-end developer, I ensured our websites looked and performed exceptionally. I used PHP (WordPress), Blade (Shopify), SASS/CSS3 & JS/jQuery to instigate HiDPI, responsive, pixel-perfect websites for their clients. I worked on builds for clients Drugsline, Emmy London & STL Partners.

Web Designer / Developer, Sleeky Web Design & Print. 2016.
I created websites from scratch: designing them in Sketch and them building them with PHP (WordPress, Opencart), CSS3 & HTML5. I was also responsible for writing blog posts and SEO content for the agency and their clients.

Competencies
PHP, Laravel, HTML5, Bootstrap 3 & 4, CSS3, SASS, MySQL, Javascript (VueJS, jQuery), Email Design (Foundation & MJML), Docker, Vagrant, Jekyll, Adobe Photoshop / InDesign / Illustrator, Sketch, WordPress, Server setup (LEMP/LAMP), Public Speaking. Typing speed: 95 wpm.
